Математическое моделирование является одним из основных методов исследования в науке. Оно позволяет исследовать сложные системы, которые невозможно исследовать экспериментально. Математическое моделирование используется в различных областях науки, включая физику, химию, биологию, экономику и социологию. Оно позволяет исследовать различные аспекты системы, включая ее структуру, динамику и поведение. Математическое моделирование также используется для прогнозирования поведения системы в будущем. Это позволяет исследователям принимать обоснованные решения на основе результатов моделирования.

Measures: The 12-item Buss-Dixson Homosexuality Attitudes Scale (Buss and Dixson 1998) was used to assess attitudes toward homosexuality. The scale consists of 12 items, such as "I would not be attracted to a homosexual person" and "I would not have a homosexual relationship." The scale is a 5-point Likert scale ranging from 1 (strongly agree) to 5 (strongly disagree). The scale has a Cronbach's alpha of 0.88 in the current study.
